PROJECTS

E-COMMERCE:- BLOG APPLICATION:-

Developed an online shopping platform using Python, Django, SQLite, HTML, CSS, and JavaScript.
Implemented features such as:-

1. User authentication such as signup, login, and logout.
2. Product Categories and Cart Management (Add to Cart and Remove From Cart).
3. Payment Gateway (Add Card Number and Card Details) and Process the Payment.
4. Order Status, Download the Order Receipt and print the Order Receipt.

BLOG APPLICATION:

It is an online blog platform using HTML, CSS, JavaScript, Reactjs, and Appwrite.

On this website I Implemented features such as:-

1. user authentication (Signup, Login, and Logout).
2. View the Profile with a user name and profile photo.
3. Add-post, delete-post and view-post.

TO-DO APPLICATION:-

Developed an online To-Do platform using HTML, CSS, and JavaScript.

Implemented features such as:-

1. Add to-do list, remove to-do list.
2. It automatically saves in local storage because I used backend data storage as a local storage. The profit of this feature if I refresh the page also then all data that are added to a todo list is saved there and displayed on the website
